AF

FULL-STACK DEVELOPER

Ahmad Faishal

Building calm, reliable software *from pixel to pipeline.*

CONTACT

Bandung, Indonesia

faishal1208@gmail.com

PROFILE

A developer working across interfaces, services and the systems that connect them. Experience with commerce, logistics, payments, finance and information systems.

CORE TOOLKIT

Interfaces

Next.js, Nuxt.js

Services

Node.js, NestJS, Express.js, Fastify

Data & jobs

MongoDB, Redis, BullMQ

Integrations

Xendit, payments, shipping

EDUCATION

Computer Engineering

Politeknik Negeri Bandung

EXPERIENCE

Mengantar

Apr 2024 - Present

Full-Stack Developer

- Berlapak (Oct 2025 - Present): develop and maintain a B2B ordering platform connecting distributors and sellers, including order management, payments and multi-courier shipping.
- Formulir (Apr 2024 - Oct 2025): refactored legacy flows into domain, service and repository layers; introduced BullMQ background jobs and extended checkout to digital products.

Clodeo

Sep 2018 - Mar 2024

Commerce, payments & finance

- Built Paydeo, a Xendit-integrated payment gateway for orders, subscriptions and e-wallets.
- Developed finance services for airwaybill monitoring, billing, invoicing and COD claims, with supporting master data.

Jasamedika

Sep 2017 - Sep 2018

Front-end development

- An early chapter in software development, building interfaces and learning the workflows behind them.

Belant Persada

Jul 2016 - Sep 2016

Software development foundations

- Began a software development career alongside Computer Engineering studies.

SELECTED PROJECTS

Rally Score - Personal project

A badminton community platform for organising sessions, managing matches and bringing players together.

Museum Beacon App - Final project, 2017

Led a student team building web and Android apps for museum reservations and location-based collection information using beacons.
